

SERVICE CENTRE

DIESEL

Diesel comes of age

Diesel cars are no longer the noisy, sluggish vehicles of ten years ago. They are sophisticated and fast, equalling the performance of many petrol alternatives.

Global Diesel Common Rail parc

With great performance, and increasingly economical, diesel is the preferred fuel for many motorists. Now you can cash in on diesel's surging popularity by offering specialist expertise in diagnosing and servicing the new generation of Common Rail fuel injection engines. How? By joining Delphi Service Centre.

This growing network of garages is backed by Delphi, who will provide all the tools, marketing and training you need to become the diesel service expert in your area.

The facts speak for themselves

The Common Rail diesel engine has fuelled the extraordinary growth in diesel cars in Europe. This cleaner, high performance, more efficient and quieter technology has changed the attitude of even the most critical drivers.

- » **European car** parc of **56 million** diesel engines
- » **50%** growth in diesel parc in the past **5 years**
- » **10 successive years of growth** in diesel sales
- » Annual new vehicle diesel registrations average growth of **10% per annum**
- » Diesel share of new car sales has reached **50%**

These hi-tech vehicles are going to need expert diagnostics and servicing at one time or another. Are you ready?

Delphi Service Centre garages are trained in diesel technology, equipped with specialist tools and are preparing for the diesel challenge. This could be you...

The Delphi Service Centre advantage

The popularity of diesel has gone hand in hand with technological advances in Common Rail engines. This means that only service centres with sophisticated equipment, training and support will be able to take full advantage of this opportunity.

Delphi Service Centre meets the challenge of Common Rail technology. And not just for Delphi systems, but for all makes including Bosch, Siemens and Denso.

It gives you the benefit of expert back-up for all technical issues, as well as the very latest diagnostic tools. What's more, we'll even help you to drive customers to your door with a range of marketing support.

The package includes:

- 1 Sealed Rail Kit for Common Rail pump and injector diagnostics
- 2 DS100E diagnostic tool for vehicle electronic systems
- 3 False Actuator Kit for Common Rail pump actuator diagnostics
- 4 Diesel Max software specifically designed for DS100E
- 5 Direct Evolution – electronic catalogue
- 6 Training voucher

A whole package of benefits

The Diesel module package has been designed to give you everything you need to tap into this lucrative market, now and in the future.

More and more new cars are diesel powered and thanks to these tools and services you can take full advantage of the ever-expanding aftermarket.

» **All makes diesel diagnostic equipment**
With our sophisticated kit you can track down faults on all Common Rail systems. The kit includes special tools to diagnose faulty injectors, high pressure pumps and, ultimately, re-programme ECUs quickly and simply.

» **Training programme**
Diesel technology is continually improving and getting more complex. Delphi training gives you complete confidence in all diesel servicing and diagnostics and helps you keep up to date with the latest developments.

» **Professional marketing support**
Our marketing package will help you to spread the word that your business is professional, reliable and uses the very latest technology. As a Delphi Service Centre we want everyone to know about your expertise.

» **Technical support**
As part of the Delphi Service Centre network you have access to Delphi trained technical experts. They are at the end of a phone to answer any day-to-day queries that arise as you work.

» **Diesel products**
OE quality diesel products are essential for you to keep customers happy. We provide rapid access to Delphi Common Rail injectors and pumps, as well as OE standard Common Rail high pressure pipes, fuel filters, glow plugs, feed pumps and solenoids – helping you get the job done fast.

» **Electronic cataloguing**
Finding the right part is simple with our electronic catalogue, Direct Evolution Lite. This provides data about the entire Delphi Diesel product range, and features easy-to-use cross referencing and diagrams.

» **Removal/refit tools**
Common Rail pumps and injectors on Delphi systems need special tools for removal and refit, and these come as part of the Diesel module package. They are designed by vehicle application, helping your technicians work safely and efficiently.

Delphi. A worldwide leader

Delphi provides quality diesel solutions to vehicle manufacturers around the globe. Our technological expertise is now available to you in the shape of Delphi Service Centre, helping you give your customers more of what they want.

» One stop shop

We offer a vast product range, for all makes of diesel. Every component is developed and manufactured to OE quality and benefits from rigorous research and development. In fact, we lead the way in product performance, using advanced materials and processes so our products last longer and work better, giving you total peace of mind.

» The right parts, every time

On top of this, Delphi scrutinises vehicle registrations worldwide so production schedules and stocks always match your needs. Whenever new models or specification changes are introduced, we're right behind them with replacement parts, such as:

- Glow plugs
- Filters
- High pressure pipes
- Injectors
- Pumps
- Diesel+ fuel treatment
- Solenoids

» Technical partners

We work closely with hand-picked Technical Partners. They in turn support you, as a Delphi Service Centre workshop, providing technical know how, marketing and rapid access to diesel products.

Be part of the Delphi Service Centre network

Don't let your competitors steal your share of the diesel servicing market. Make sure you have the diagnostic tools, expertise and backup that your customers demand.
